

## ***Safety and Insurance Committee***

Chairman: Bob Johnson  
Safety Operations Manager  
Granite Construction Inc.

Bobby Johnson was appointed in 2007 to serve as chairman of ARTBA's Safety and Insurance Committee (SIC). He has worked as a construction safety professional for more than 24 years and currently manages more than 75 full-time safety professionals at Granite Construction, one of the nation's largest heavy and highway contractors. In 1995 California AGC named him Safety Professional of the Year. He is a member of the National Stone Association's safety and health committee and a past chairman of the CMAC safety and health committee. He is also a member of Occupational Safety and Health advisory committee at Murray State University.

As chairman of ARTBA's SIC committee, Bobby's explains his priorities in a simple and straight forward manner: *"It is all about worker safety to me. Sending our employees home each day is always my number one goal."* Bobby hopes to share some of the insight and ideas he has gained throughout his successful career with other ARTBA members who may not be as experienced in developing and running successful safety and health programs. Through the SIC, Bobby hopes to oversee the development and dissemination of several new ARTBA safety initiatives and training programs.
