

PROJECT MANAGEMENT ACADEMY

Date: 01/11/10 - 01/15/10

Location: Washington, DC

This intensive four-and-a-half day program, ideal for new or prospective project leaders, provides both substantive theory and practical application of project management principles for road and bridge building construction project managers. Among the topics covered are project planning, scheduling and management, effective client relations, job-site teamwork, safety and risk management, team building and ethics.

This academy is led by a world class faculty. To learn more about each of these industry pros, click on their name below to read their biography.
